DETAILED ACTION

Election/Restrictions

1. Claims 8-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/7/04.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the embossing pattern on the second surface claimed in claim 7 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of

the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ishizuka (6,172,439), Suzuki et al. (5,777,415), Teshima et al. (5,783,880).

Regarding claim 1, Ishizuka shows a motor rotor including a magnetic yoke (8) and a rubber magnet (9) provided in the magnetic yoke, wherein the motor rotor is characterized in that a first surface (92) of the rubber magnet facing the magnetic yoke has at least one first pattern (10).

Suzuki et al. and Teshima et al. also show all of the limitations of the claimed invention in Figure 2 and Figure 3, respectively.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsu (6,140,736) in view of Horng (6,362,551).

Regarding claim 1, Hsu shows a motor rotor including a magnetic yoke (31) and a magnet (30) provided in the magnetic yoke, wherein the motor rotor is characterized in that a first surface of the magnet facing the magnetic yoke has at least one first pattern (303).

Hsu does not show the magnet being rubber.

Horng uses rubber magnet (3) for the purpose of reducing manufacturing cost.

Since Hsu and Horng are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use rubber magnet as taught by Horng for the purpose discussed above.

Regarding claims 2-6, it is noted that Hsu and Horng also show all of the limitations of the claimed invention.

8. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hsu (6,140,736) in view of Horng (6,362,551) and further in view of Couture et al. (5,753,911).

Regarding claim 7, the motor of Hsu modified by Horng includes all of the limitations of the claimed invention except for the second surface being an embossing pattern.

Couture et al. discloses an embossing pattern for the purpose of concentrating magnetic flux.

Since Hsu, Horng and Couture et al. are all from the same field of endeavor; the purpose disclosed by one inventor would have been recognized in the pertinent art of the others.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to make the second surface with an embossing pattern as taught by Couture et al. for the purpose discussed above.
